

# HDFC Debt Fund for Cancer Cure

A Review

## Introduction

Six years ago, to commemorate our 10th anniversary, HDFC Debt Fund for Cancer Cure (HDFCC), a 3 year close ended capital protection oriented income scheme was launched in association with Indian Cancer Society (ICS), a Public Charitable Trust and India's oldest anti-cancer NGO established in 1951, to fight cancer. We followed that up with a second scheme in 2014 with the same attributes to continue the work done.

As a commitment to the cause, HDFC Asset Management Company Limited (HDFC AMC) has waived all charges towards Investment & Management fees.

**In addition, HDFC Asset Management Company Limited commits to contribute an amount equal to the donation from investors through this scheme, thereby doubling the impact of the investors' donation.**

## How Does the Fund Work?

HDFC Debt Fund for Cancer Cure (2014) (HDFCC2014) is a capital protection oriented debt scheme which invests in predominantly AAA rated securities. The fund gives investors an option to donate either 50% or 100% of the dividend proceeds to the Indian Cancer Society (ICS). Donation of income to ICS is eligible for deduction U/S 80G of Income Tax Act, 1961.

The money raised through donation of dividend income by investors has been utilized by ICS for the treatment costs of needy and under-privileged cancer patients. The needy patients are identified after thorough due diligence by a team of doctors and finally approved by Governing Advisory Council, currently headed by Mrs. Usha Thorat, ex-Dy Governor, RBI. The cancer patients identified typically have an annual income of less than Rs 1 lac.

The maximum amount sanctioned per patient at Rs 4 lakh invariably covers the entire cost of treatment in most cases and this helps the patient and the hospital start the treatment early.

**The financial assistance covers the following costs**

## About The Indian Cancer Society

Established in 1951 by Dr. D.J. Jussawalla and Mr Naval Tata as India's first voluntary, non-profit, National Organization for Awareness, Detection, Cure and Survivorship of those affected with this disease.

### Activities of the ICS

- Creating nationwide awareness of cancer, its risk factors, preventive measures, encouraging regular check-ups, treatment options and survivorship.

- Providing for early detection of cancer through cancer detection centres and mobile cancer detection camps across India, especially for the underprivileged.
- Providing funds for the treatment of cancer for poor cancer patients across India
- Providing support during and after treatment to poor cancer patients through accommodation, rehabilitation, and survivor support groups.
- Gathering and collating data through the population based cancer registry for Mumbai, Pune, Nagpur and Aurangabad (ICS is the only NGO to run a cancer registry), and providing analytic and projected reports on the incidence of cancer.
- Providing a medium for the dissemination of information and research findings to the medical fraternity through the Indian Journal of Cancer.
